Schooling Status of Children: **year 7 and year 2**

Does the family own the land where they live: **Yes**

Comments: Very small land with a small house on it.

### Brief description of family living status:

The family have borrowed money from the bank to purchase 700 ducks. The husband leaves home for 3 months at a time to herd the ducks across the neighboring provinces to feed the ducks in the rice fields after harvest. The average rental of a rice field after harvest is about 3,500,000 VND (\$230). The husband sells the eggs along the way to pay for field rental and keeps small amount of profit. The family is living in a very small and poor condition house with two children. Average number of ducks in a herd in Vietnam is around 8,000 to 10,000 in this region. Therefore, the number of ducks of this family is minimal with a very low income generation.

### Type of Humanitarian Relief:

Rima Foundation would like to improve this family income by providing ducks (total donation 50,000,000 VND) to generate income by selling produced eggs. Cost of each duck is approx. between 60,000 – 75,000 VND (\$4.00 – \$5.00). 750 to 670 ducks + 3,000,000 for transport.
